**DETAILED ACTION**

1. This action is in response to Applicant's After Final amendment filed October 9, 2009. Claims 1-27, 30-37, 39-48, 50-60, 62-85, 87-101, 104-112 and 144-148 have been canceled. Claims 113-143 are pending.

***Reasons for Allowance***

2. Claims 113-143 are allowed.
3. The following is an examiner's statement of reasons for allowance:

With respect to independent claim 113, none of the prior art of record, taken individually or in any combination, teach inter alia, the computer system receiving a first quantitative input from a user, the first input corresponding to movement of the first user adjustable icon; the computer system determining a second allowed input range for a second user adjustable icon based on the first input, wherein the bottom of the determined second allowed input range for the second user adjustable icon is the value of the first quantitative input; the computer system displaying the second user adjustable icon such that the full width of the second user adjustable icon corresponds to the determined second allowed input range; and the computer system receiving a second quantitative input from the user, the second input corresponding to movement of the second user adjustable icon.

4. The prior art references most closely resembling Applicant's claimed invention are Guinta et al (USPN 5,737,494), Barton et al (US 2002/0059093) and Mann et al (US 2002/0019765).

Guinta et al disclose a method of using a computer to gather information about an organizational process or system (column 2, lines 39-40), comprising: obtaining information about an organization to be accessed, wherein the information comprises information regarding assessors (i.e., assessor being someone who has knowledge about the organizational process or system, which inherently indicates that information was obtained regarding the assessor, that indicated that the assessor indeed had knowledge of the organizational process or system to be assessed, column 5, lines 62-63); preparing at least one question regarding the organizational process or system by analyzing the obtained information about the organization (i.e., computer driven questions adapted to prompt the assessor, column 5, lines 58-60); displaying on a display device a first user adjustable icon (i.e., sliding bar indicating a response to how well does your process address this issue, figure 5A) and a second user adjustable icon (i.e., sliding bar indicating a response to how well is your process deployed, figure 5E); and wherein the at least one question being adapted to prompt the assessor to input the assessor's perceptions of the organizational process or system; receiving a first quantitative input from a user, the first input corresponding to movement of the first user adjustable icon, (i.e., how well does your process address the issue, determined via sliding bar with a maximum value of 100%, figure 5E).

Barton et al disclose centralized database 18 stored remotely from server 12, wherein database 18 is checked out to PDA. Further, once the data has been modified through the PDA, the data can be re-checked into database 18 from the PDA (¶ 0049).

Mann et al disclose an evaluation database 5 to track the progress of an evaluation, including a deadline for completing the evaluation 903 (¶ 0061), and an administrator to track the status of the evaluations (¶ 0063).

However, none of the cited prior art discloses the computer system receiving a first quantitative input from a user, the first input corresponding to movement of the first user adjustable icon; the computer system determining a second allowed input range for a second user adjustable icon based on the first input, wherein the bottom of the determined second allowed input range for the second user adjustable icon is the value of the first quantitative input; the computer system displaying the second user adjustable icon such that the full width of the second user adjustable icon corresponds to the determined second allowed input range; and the computer system receiving a second quantitative input from the user, the second input corresponding to movement of the second user adjustable icon.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
